

Retreat Philosophy

Introduction

The retreats in *Quest* are an integral component in the overall design of the curriculum. This retreat experience offers a unique opportunity for participants to explore the deep spiritual issues that speak to the mind, body, and spirit. These residential retreats provide the space and quiet that foster internal reflection. The retreats are planned at intervals so that the themes and issues can continue to be explored in integration groups and with mentors. During the months between retreats, participants have time to reflect on the experience and can also explore these issues in their ongoing spiritual practice.
